Profile

I am an IT student with basic knowledge of programming, databases, and system analysis. I have participated in several web development projects with responsibilities in requirement analysis and feature development. I am seeking opportunities to improve my business analysis skills and gain practical experience in a professional working environment.

Projects

Building a website for selling online courses

- Developed frontend and backend functionalities for the system.
- Designed and managed the database for data storage.
- Supported system testing and optimized processing workflows.

Building a platform for booking local experiences, "Local Vibe"

- Participated in requirement analysis and supported system testing.
- Designed the database and supported UI improvements to the system.

Didau-travel-Website

- Supported the development of user interfaces and admin interfaces.
- Participated in website functional testing and debugging.

Education

Thai Nguyen University of Information and Communication Technology 2023 - Present

Major: Information Technology
